

## WHO WE ARE

RODMENA LIMITED is a London company that builds secure, auditable platforms that bring compliance, trust and artificial intelligence together in one system. They run on the customer's own infrastructure or as a service. Every certification, policy and figure we publish shows its current status and the date it was last checked.

## WHAT WE DO

- **Software platform development.** We design and deliver bespoke platforms end to end, from the first architecture review to a service running in production that your own engineers can operate without us.
- **Distributed systems.** We build fault-tolerant, horizontally scalable systems designed for reliability under load, using established concurrency and messaging patterns.
- **Workflow automation.** We design and implement durable workflow orchestration, including event-driven flows, human-in-the-loop steps and custom workflows, and deploy and configure our Highway engine where it suits.
- **Cloud and data infrastructure.** We design and build cloud and data infrastructure: environments that can be rebuilt from their own definitions, monitoring that shows what is happening, backups that have been restored from, and a running cost that is known before it arrives.
- **Integration.** We connect systems, APIs and third-party services, and bridge legacy platforms to modern infrastructure in stages, without a big-bang migration.
- **Support and consultancy.** We provide ongoing support, training and engineering consultancy for the systems you depend on, through the engineers who build and operate our own.

## PLATFORMS WE BUILD AND RUN

- **Highway** workflow engine
- **Provenance** bill of materials (beta)
- **Trace** commercial record (beta)
- **AgentBus** agent message bus
- **Knowledge base** documentation
- **Vellum** subject access requests (beta)
- **MailApi** email api
- **reTunnel** ingress (beta)
- **RODMENA CI** continuous integration
- **Futex** human-in-the-loop approvals
- **TokenGate** quota management
- **Uptime.Systems** uptime monitoring
- **Ledger** financial infrastructure
- **Haven** secret management (beta)
- **RODMENA ID** single sign-on
- **REES** RODMENA enterprise education system (in development)
- **RCaaS** RODMENA communication as a service (in development)

## ASSURANCE

Cyber Essentials certified, whole organisation (certificate 00d24b59-7739-4d97-bb66-341ac50ef018, valid until 30 September 2027). Also held: ICO Data Protection Registration. Cyber insurance in place. Evidence available on request from [security@rodmena.co.uk](mailto:security@rodmena.co.uk). ISO/IEC 27001 and Cyber Essentials Plus are on the certification roadmap; professional indemnity, public liability and employer's liability cover is bound under one policy from 1 November 2026. The current status of every certification, insurance policy and company policy is published at [rodmena.com/trust/](https://rodmena.com/trust/). This website uses no cookies, analytics or trackers, and publishes a responsible-disclosure policy (RFC 9116 security.txt).
